NEW ERA IN PATIENT CARE WITH MS200

Perfect Harmony of Technology and Comfort

Advanced Solutions for Modern Healthcare Environments

When it comes to striking the right balance between clinical efficiency and a soothing room atmosphere, MedSistem MS series solutions make it seamless to integrate state-of-the-art technology into patient-centred interiors.

For over 25 years, MedSistem has delivered high-quality solutions to hospitals across the globe—providing more than 100,000 bed spaces with patient-care units that combine technical excellence, environmental responsibility, and a forward-thinking vision for the future of healthcare.

The MS200 Normal Type Bedhead Unit is designed to optimize both medical performance and interior aesthetics. It offers long-lasting reliability, easy operation, and full compliance with international standards, while prioritizing user safety and patient comfort.

Engineered for Functionality and Style

- The housing is constructed from extruded, naturally anodized aluminium, ensuring structural strength and visual harmony.
- Service panels are made from anodized or electrostatically painted aluminium, customizable to match your room's design.
- Electrical sockets, nurse call systems, and communication ports are ergonomically located on the front panel for easy access.
- Medical gas outlets are also placed on the front for maximum usability.

Smart Lighting Integration

At the top, general lighting provides glare-free illumination to the room, while at the bottom, a focused reading light enhances comfort for patients.

All MedSistem bedhead units come with optional lighting controls and custom configurations, including:

- DALI or 0–10V dimming
- LED-based warm or cool tones
- RGB ambient lighting for mood enhancement

Let us know your lighting requirements—we'll offer the perfect solution.

Tailor-Made for Your Project

Every hospital has unique architectural and clinical requirements. Thanks to our advanced planning capabilities and modular construction methods, we offer fully customized configurations to meet your exact needs.

Together, we will develop the perfect solution for your project—designed to perform, built to last.
